

Energy Policy

1. Purpose

The purpose of this policy is to define our company's approach and fundamental principles for the efficient and responsible use of energy resources while conducting its activities. Our company aims to improve energy efficiency, effectively manage energy consumption, and reduce environmental impacts.

2. Scope

This policy covers:

- All employees of the company,
- Managers,
- Production and support processes,
- All activities related to energy use within company facilities.

The company is committed to complying with applicable legislation and relevant standards in all energy management activities.

3. Core Principles

Energy Efficiency

Improvement activities are carried out to ensure efficient use of energy resources and to reduce energy consumption.

Monitoring Energy Performance

Energy consumption and energy performance are regularly monitored, measured, and evaluated.

Continuous Improvement

A continuous improvement approach is adopted to enhance energy performance within the energy management system.

Monitoring Technologies and Innovations

New technologies and practices that may improve energy efficiency are monitored and evaluated where appropriate.

Employee Awareness

Training and awareness activities are conducted to increase employees' knowledge and awareness of energy efficiency.

Compliance with Regulations

All company activities are carried out in compliance with applicable energy and environmental legislation.

4. Responsibilities

- Top management supports the implementation of the energy policy and provides necessary resources.
 - Managers oversee the implementation of energy efficiency practices within their areas of responsibility.
 - Relevant departments are responsible for monitoring energy consumption and carrying out improvement activities.
 - All employees act responsibly in the efficient use of energy resources.
-

5. Enforcement

This policy enters into force upon approval by the Board of Directors and is binding for all employees within the scope of company activities. The policy is reviewed periodically and updated in line with improvements in energy performance.
